EE 315 Lab Assignment for Week 02

Important Note: This is the first lab. It will mainly be a demonstration by your teaching assistant (TA). You will be introduced the evaluation kit, Keil, some coding and some debugging tools. After the demonstration you are expected to perform a simple debugging task over the code you are provided.

- *Download the project folder for Lab 1.*

- *The project assembly code is "EE315Lab1.s". Go over the comments of the code.*

- *By changing the value for R1 and R2 in line "38-39" rerun the code and observe the results in debug mode.*

- Share your observations with your TA.
